	Fiscal 2007	Fiscal 2008	Million of yen Fiscal 2009
Net Sales	681,547	865,587	739,365
Operating Income	23,822	46,462	1,908
Ordinary Income	8,001	30,437	(12,259)
Net Income	12,095	50,416	(28,392)
Net Income per Share (yen)	21.85	75.44	(42.49)

Message from the Chairman, and President and CEO

On behalf of the NSG Group, we would like to thank you for your continued support. We are pleased to present the report for the period ended 31 March 2009.

The past year has been a particularly challenging one for the Group. The Group's results for FY2009 reflect the global slow-down in international trade, with a sharp contrast between the outcomes for the two halves of the financial year. In the first half-year, we were able to announce that sales and profits were in line with the forecast, with further progress achieved on reducing debt. In the second half, all three of the Group's business lines were adversely affected by the unprecedented slump in world trade.

In January 2009, we announced restructuring initiatives designed to address the economic downturn and to improve profitability going forward. These built on action already taken by management in response to the sudden and rapid changes in the global economic environment. Good progress has been made in implementing these initiatives, which are designed to reduce capacity and output around the Group to match the requirements of our customers.

In FY2010, our focus will be on implementing the restructuring program, including additional measures already announced. The clear aim is to protect the business in the short term and help re-establish profit growth from FY2011 onwards.

We look forward to your continuing understanding and support of our activities.

Katsuji Fujimoto Chairman of the NSG Group
Stuart Chambers President and Chief Executive Officer

July 2009

Katsuji Fujimoto
 Chairman of NSG Group
 Director
 Nippon Sheet Glass Co., Ltd.

Stuart Chambers
 President and CEO
 Representative Executive Director
 Nippon Sheet Glass Co., Ltd.

Interview with the President

Q1 Please can you comment on the NSG Group's results for FY2009 and progress on the strategic objectives of the Group?

The Group's full year results for FY2009 are in line with the previous forecast, but reflect the unprecedented global downturn, which is affecting all three of our business lines in all of our markets. The results were characterized by a sharp contrast between the first and second halves. Our markets held up relatively well during the first six months and then deteriorated from the third quarter.

Overall, the Group's revenues were JPY739 billion (down 15 percent) and Operating Profit (before amortization) was down 68 percent at JPY22 billion. In the business lines, revenues for Building Products were JPY348 billion and operating profit (before amortization) JPY20 billion. Automotive revenues were JPY299 billion and operating profit (before amortization) JPY12 billion. In Specialty Glass, revenues were JPY75 billion and operating profit JPY4 billion.

During the year, one of our subsidiaries received a fine from the European Commission of EUR370 million, following the conclusion of its investigation into alleged breaches of competition law by companies operating in the European car glass sector. We do not agree with the decision and have submitted an appeal to the European Court of the First Instance, but the fine was paid on time as required by European Union law.

We have made good progress on our strategic objectives and I am particularly pleased to report that we attained our net debt target of JPY350 billion a year ahead of schedule. A new integrated global organization has now been established, with further progress on the realization of synergies. Preparatory work on growth opportunities in Phases 2 and 3 of our 3-phase strategy is underway.

Q2 Can you please explain the details and objectives of the restructuring measures?

We announced restructuring initiatives designed to address the economic downturn and to improve profitability going forward. These build on action already taken by management in response to the sudden and rapid changes in the global economic environment. The total income statement charge for the restructuring program is expected to be around JPY25 billion.

The overall objective of the program is to protect the business in the short term and to re-establish profit growth from FY2011 onwards. Good progress has been made in implementing these initiatives, which are designed to reduce capacity and output around the Group to match the requirements of our customers.

Sadly, under the current restructuring program, we need to reduce overall headcount in the Group by approximately 6,700 people by March 2010. Around 4,500 of these employees had already left the Group by 31 March 2009.

The restructuring includes management headcount reduction through reorganization, shift reductions and line closures in some plants and temporary and permanent plant closures throughout our global operations.

NET DEBT Millions of yen

Note: --- Allowance for EC fines

CONSOLIDATED NET SALES BY BUSINESS

CONSOLIDATED NET SALES BY REGION

Q3 Against this background, what is the current status of the Group's Medium-term Plan? Are we still adhering to the original strategy?

The 10-year strategy published in July 2006 is still very central to our long-term vision and the basic objectives remain in place. What will inevitably change is the timetable for achieving the Medium-term Plan targets, which were set for March 2011. We are currently in Phase 1 and we have made good progress on what was originally expected to take four years. At first, we were hopeful that we would be able to deliver the targeted results ahead of schedule. Now that we have to contend with the impact of the economic downturn, it is more likely to take the full four years. We are currently reviewing the details of our strategy in the light of the current global downturn.

Fortunately, we had already made some good progress in preparing for Phase 2 before the downturn, with some important strategic investments in key markets. Now, we are going to have to slow down our investment plans until the future becomes clearer. We have already announced that we will be reducing total investment, with some projects, such as windscreen expansion in South America, delayed. We need to capitalize on the Solar opportunity; so, provided the business delivers, it will get a larger slice of the reduced investment pie.

Interview with the President continued

The NSG Group is well positioned to supply the growing solar energy sector

Q4 What is your current assessment of the longer term future of the NSG Group?

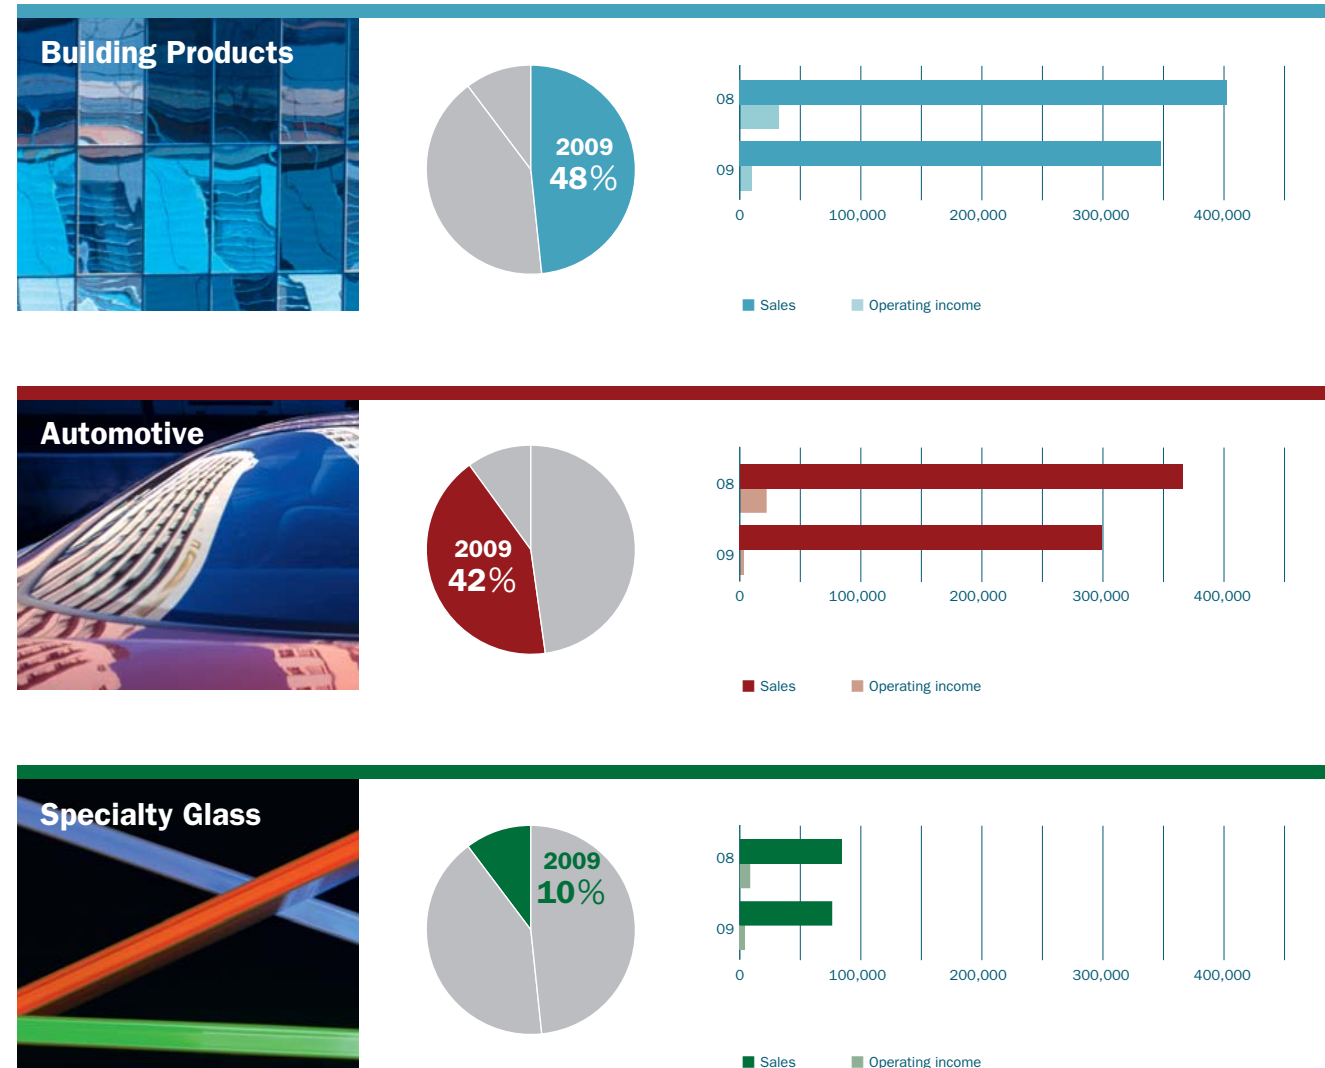

In the current global turmoil, it is important that we do not lose sight of the excellent progress that has been made by the Group over the past three years on our most important targets — integration and debt reduction. This provides us with a very robust platform from which to develop. It is a credit to everyone in the Group and it will be a key factor in determining how we weather the current storm.

We should also bear in mind that we operate in an industry with a future. Over the long term, growth in demand for glass has always exceeded economic growth and I expect that to be the case again. Our products have always been crucial to a number of key industries, notably construction, automotive, printers and mobile phones — and that is not going to change fundamentally.

In addition to that, we are in a very strong position to supply the emerging solar energy sector. Despite the current economic disruption, our new Solar Energy business unit has held up well. Some of our customers have slowed down their plans, but they still clearly share our view that solar energy is set to make an important contribution in the short and long term.

Business Summary by Segment

GROUP SALES AND OPERATING INCOME Millions of yen

Note: figures indicate sales to outside customers in each segment

Review of Operations

Building Products

Building Products (BP) profit performance was lower than the previous year, with the Group's businesses experiencing higher input costs and increasingly challenging market conditions.

In Europe, demand reduced sharply from the final quarter of 2008. Revenue in BP Europe, the Group's largest business, reduced, due to lower prices, volumes and exchange rates. Higher input costs, lower selling prices and volumes reduced operating income.

Despite a depressed market in Japan, sales revenues in our business increased, due to higher prices and an improved product mix and the change in the year end of a number of our subsidiaries. Profits were up on last year, with rising input costs offset by an improving product mix and the benefits of the restructuring.

In North America, demand for glass weakened sharply, particularly in the residential sector. Revenues in our business were flat, despite a declining domestic housing market, due to higher prices and improved mix. Profitability was lower than last year, because of rising input costs and the cold repair of our Ottawa float line, which lasted three months.

In the rest of the world, sales were higher than last year, with profits in South America, remaining at satisfactory levels. Profits in South East Asia declined.

The contribution from solar energy glass for photovoltaics increased as worldwide markets continued to expand, albeit at a slightly slower rate. As a result, the Building Products business achieved sales of ¥347,833 million and operating income of ¥10,622 million.

Automotive

Overall, Automotive's first half year performance was strong, with increased sales and profits in the Original Equipment (OE) and glass replacement (AGR) businesses, but markets then declined, with rapid and unpredictable volume reductions and with profitability adversely impacted.

In Europe, cumulative revenues were below last year, with significantly lower OE demand during the second half. AGR demand was less severely impacted. Profits were also below the previous year, reflecting sharply lower sales.

In Japan, the first three quarters of the year saw improvements in manufacturing and operational performance, leading to increased profitability. In the fourth quarter, vehicle manufacturers cut production to address reductions in sales into both domestic and export markets.

In North America, AGR sales and profits were similar to last year. OE sales continued down on last year, with accelerated lower market demand in the third and fourth quarters. Higher energy costs and a float line re-build combined to significantly affect business performance.

In the rest of the world, revenues were relatively strong, with the markets proving more resistant to recession than the more developed markets. Nevertheless, the rate of growth slowed sharply during the third and fourth quarters and profits fell, with cost reduction improvements offset by increasing input costs.

The Automotive business recorded sales of ¥299,096 million and operating income of ¥1,292 million.

Specialty Glass

Overall, all of the niche sectors in which the Speciality Glass business operates have been affected by the global economic slowdown, particularly from the fourth quarter of FY2009.

The largest segment of the Specialty Glass business is in displays, where the Group is globally recognized as a leading supplier of ultra-thin float glass, used in small to medium flat panel displays. In this sector, touch panel is a rapidly growing application. Reduced global demand for electronic equipment, including mobile phones, has affected this sector.

Another segment includes patented optical products, such as SELFOC Lens Array (SLA™) and SELGUIDE™; used for multi-function printers, scanners and other compact office equipment. SLA™ is an important element in the development of LED technology applied to commodity printer markets. This sector has been impacted by reduced sales of office equipment worldwide.

The recent weakening of the yen against the US dollar offered some assistance to exports from Japan of components for printers and scanners. Demand for glass-reinforced cord used for engine timing belts has been badly impacted by the global deterioration in new car sales. Some Specialty Glass markets show signs of recovery, but are still at low levels.

The Specialty Glass business recorded overall sales of ¥ 75,397 million and an operating profit of ¥3,757 million.

Other Operations

This segment covers corporate costs and engineering income, but also includes small businesses not included in the segments covered above. Other operations benefited from a reduction in general expenses.

Consequently, this segment recorded sales of ¥17,039 million and an operating loss of ¥13,764 million.
